Paddle Pop Stick Box

Make a box to store your treasures. Or make one as a present for somebody, featuring something that is special to them.

You'll need:

- Plain or coloured paddle pop sticks (you can either save them and wash them, or buy them in a packet for about 3 dollars at a discount place). You can even use straws.
- Glue
- A feature to put on your lid. It could be a small rock or pebble, a piece of Lego, a miniature football or other cake top decoration, a toy car etc.

Method:

- Lay down a row of sticks side by side to form a square base for your box. Hold them together by gluing two sticks going the other way.
- To make the sides, glue sticks at each end and build up in layers until you get to the height you want.
- Make the lid in the same way that you made the bottom of the box, but don't glue it to the box!
- Stick your feature to the lid to use as a handle.
