

# ALLSORTS AT HOME

## Egg Carton Gardens

If you don't have much space or want a special indoor project, then this is the one for you....you can even eat the results!

Visit [redtedart.com](http://redtedart.com) for more ideas and images.

### You'll need:

- An egg carton – either a six or 12
- A plastic tray or something to catch the water
- Soil
- Seeds (herbs are best – chives, rosemary, mint, parsley)

### Method:

- Fill each egg space with soil.
- Plant seeds in the soil.
- Water the soil and seeds and place carton on a tray or plastic sheet and watch your plants grow.
- If you have a window sill in your room, that is a great place to capture the sun but still have it inside.
