Traralgon Recreation Reserve and Showgrounds Masterplan

The 'Traralgon Recreation Reserve and Showgrounds Masterplan' intends to provide clear direction for future planning, provision and enhancement of sport and community infrastructure at the Traralgon Recreation Reserve and Showgrounds.

The Master Plan was initially drafted in 2015 to help deliver the vision of creating 'a multi-use open space venue that provides for organised sport, regional and community events and informal activities, whilst recognising and retaining the site's strong historical and cultural significance'.

A number of community and stakeholder consultations since have informed additional drafts and consultation in early 2020 has led to the current draft of which Council is now seeking community feedback.

What does the 'masterplan' do?

The DRAFT 'Traralgon Recreation Reserve and Showgrounds Masterplan' provides a concept plan, as well as a prioritised opportunistic approach to making the overall vision a reality.

Masterplans are used to ensure places are strategically planned with the input of the community and provide a clear direction for the future development of a place.

It is important to note that the opportunistic steps or priorities identified in this masterplan are not currently planned or budgeted for by Council and therefore do not have a set delivery timeframe.
