

Fire Prevention Commercial Contractors

The provision of this list is to assist property owners and occupiers with pre-season preparation or when subject to a Fire Prevention Notice during the 2025-2026 Fire Danger Period.

*Please note: Latrobe City Council does not recommend any particular operator or provide any guarantee as to suitability of services. Council takes no responsibility, nor accepts any liability, for activities carried out by any operator engaged by a property owner. **Property owners engage operators at their own risk.***

The following private operators have indicated to Latrobe City Council their interest in undertaking land maintenance and fuel reduction works on private property, typically consisting of grass slashing, vegetation management, removal of other fuel loads and creating fire breaks. Please note:

- The onus is on the property owner/s or occupier/s to ensure compliance with a Fire Prevention Notice, **not the operator**
- Not all listed operators may provide services required across the entire municipality
- Summer can be a particularly busy time for some operators, and it may be difficult to obtain services at short notice
- This is not an exhaustive list. Other options to locate contractors in your area include via an internet search, Yellow Pages or social media

Latrobe City Council strongly recommends that any operator you engage has their own Public Liability Insurance.
