

# traralgon activity centre plan | community bulletin 5

november 2011

## project update

The Traralgon Activity Centre Plan project aims to plan for the future growth of the Traralgon town centre over the next 20 years. It is one of several strategic planning projects that Latrobe City Council are currently undertaking to plan for Traralgon's future.

A draft Key Directions Report has been developed containing 18 key directions. Earlier this year this report was placed on public exhibition inviting community feedback via written submissions.

Council has received the written submissions and has considered the content of those submissions.

Subsequently and as a result of the submissions received, Council has resolved to give a greater priority to two of the key directions listed in the draft Key Directions Report. The two key directions of particular interest are:

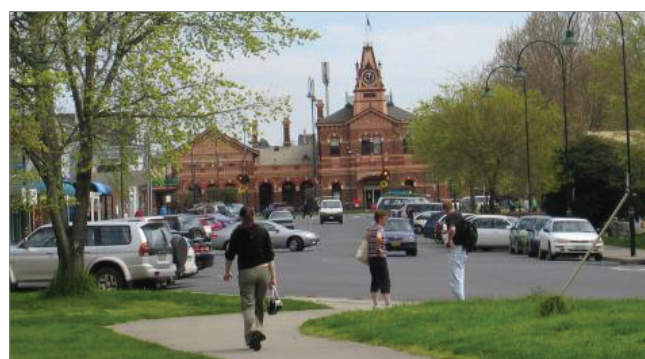

- Key Direction 4 Develop a Parking Precinct Plan and;
- Key Direction 5 Provide integrated car parking solutions in appropriate locations.

The Traralgon Activity Centre Plan project will now focus its attention on progressing these two key directions over the next few months.

## parking precinct plan and integrated parking solutions

The Parking Precinct Plan will include a Parking Strategy which will consider solutions to address the issues with car parking in the Traralgon town centre that have been identified through the community consultation. Integrated parking solutions may include short term options such as reviewing the time allocation of parking spaces and improved signage.

Longer term options may include identifying locations for new multi-deck car parks in the future and other potential solutions put forward by the community.

## interim parking arrangements

In the lead up to the Christmas period Latrobe City Council will be introducing some temporary changes to parking in Traralgon.

One-hour parking limits in Traralgon's CBD will be extended to two-hour limits from Monday 5 December 2011.

Latrobe City Council will continue to monitor parking arrangements during this interim period to ensure that these two hour parking restrictions continue to be consistent with the longer term aims of the parking strategy and parking precinct plan.

## how you can be involved

Early in 2012 Latrobe City Council will be establishing a Parking Precinct Plan Working Group to provide advice to Council on car parking issues and possible long term solutions. This Working Group will be chaired by the Dunbar Ward Councillor and 'expressions of interest' are currently being advertised in local newspapers. Representatives from business and community groups will be invited to join the Working Group and places will also be available for interested community representatives.

## project timelines

The remaining 16 key directions from the draft Traralgon Activity Centre Plan Key Directions Report will be further progressed following the development of the Parking Strategy.

The draft Key Directions Report is available to view on Council's website at [www.latrobe.vic.gov.au](http://www.latrobe.vic.gov.au)
